

Turkish Angora

General Standard

The ideal Turkish Angora is a balanced, graceful cat with a fine, silky coat that shimmers with every movement, in contrast to the firm, long muscular body beneath it.

Head	Small to medium, in balance with the length of the body and extremities. A medium long, smooth wedge. Allowance is to be made for jowls. In profile, two planes formed by a flat top head and the line of the nose meeting at an angle slightly above the eyes.
Ears	Large, wide at base, pointed and tufted. Set closely together, high on the head, vertical and erect.
Eyes	Large, almond-shaped, slanting slightly upward with open expression.
Nose	Medium length. No stop.
Jaws	Muzzle to be a continuation of the smooth lines of the wedge with neither pronounced whisker pad nor pinch.
Chin	Firm, gently rounded. Tip in profile to form perpendicular line with nose.
Neck	Slim, graceful and rather long.
Body	Medium size, however, overall balance, grace and fineness of bone are more important than actual size. Males may be slightly larger than females. Body is long and slender, possessing greater depth than width, oval rather than round (not tubular). Shoulders the same width as hips. Rump slightly higher than shoulders. Finely boned with firm muscularity.
Tail	Long and tapering from a wide base to a narrow end, with a full brush.
Legs	Long. Hind legs longer than front.
Paws	Small, round and dainty. Tufts between toes preferable.
Balance	Proportionate in all physical aspects with a graceful, lithe appearance.
Condition	Excellent condition is required. Any indication that the cat is not in good physical condition or has not had proper grooming should be penalised.

Scale of Points

Head (incl. shape & profile)	15	
Ears (incl size & Placement)	15	
Eyes (incl size, shape & placement)	10	
Body (incl. size, body, boning & neck)	25	
Paws & Tail	5	
Coat & Colour	15	
Balance	10	
Overall Condition	5	
Total		100

Faults & Penalties

Refer to general list of faults for all breeds plus:

Penalise:

- **Obviously oversized.**
- **Coarse appearance.**

Disqualify:

- **Cobby body.**
- **Kinked or abnormal tail.**
- **Crossed eyes.**

The above disqualifiable faults require a harsher penalty than in the CCCA general list of faults.

Coat & Colour

Coat Length & Texture	Single coated. Length of body coat varies, but tail and ruff should be long, full, finely textured and have a silk-like sheen. "Britches" should be apparent on the hind legs.
Coat Colour & Pattern	All colours and patterns accepted and all should be considered of equal value. All recognised colours or combination of colours except choc, lilac, cinnamon fawn, caramel & apricot & any recognised pattern except the Himalayan pattern. Note - White buttons or lockets are permitted.
Eye Colour	There is no relationship between eye colour and coat colour, and each eye colour type can include much variation within its spectrum, especially as cats mature. Acceptable eye colours include: <ul style="list-style-type: none">• Blue, which encompasses shades from sky blue to sapphire;• Green, which can range from gooseberry to emerald;• Green-gold, which includes any gold or amber eye that carries a greenish cast or ring;• Amber, which can range from gold to rich copper but has no green cast or ring; and• Odd-eyed, with one blue eye and the other green, green-gold or amber. While no points are specifically allocated to eye colour, deeper, richer tones are preferred. Odd-eyed cats should have similar depth of colour in both eyes.
Nose Leather	Plain or mottled, to tone with the coat colour in the nose area.
Paw Pads	Plain or mottled, to tone with the coat colour in the paw pad area.
